

WF Task Assignments (Customer) Cube

[Return to Sales Model Overview](#)

The [WF Task Assignments \(Customer\)](#) cube contains the user configuration of the workflow. A specific workflow activity can be assigned to single or multiple user groups. Members of these user groups are responsible to execute the activity. See the article [Assigning activities to user groups](#).

This cube consists of the following dimensions:

- Dimension [_WF Task](#): See the article [_WF Task dimension](#).
- Dimension [Customer](#): This is the workflow step dimension which is shared with the fact cube.
- Dimension [_WF Activity](#): See the article [_WF Activity dimension](#).
- Dimension [#_GROUP_](#): The system dimension containing all user groups.
- Dimension [WF Task Assignments_measure](#) containing the following measures:

Element	Definition
Assigned	1 - If the workflow activity of the workflow step in the workflow task is assigned to the user group of dimension <code>#_GROUP_</code> . Empty otherwise. (string)
Active	1 - If the workflow activity of the workflow step in the workflow task is assigned and also currently active. 0 Otherwise. (calculated, string)
Read, Write	1 - If the workflow activity of the workflow step in the workflow task is active and defined to be read-only. 0 otherwise. (calculated, string)
