

# Replace Function

The Replace function replaces the text of an input field in accordance with a regular expression. Details of the syntax of regular expressions can be found at [http://en.wikipedia.org/wiki/Regular\\_expression](http://en.wikipedia.org/wiki/Regular_expression).

Input consists of one input field.

## Parameters

---

<b>Regex</b>	The regular expression
<b>Replacement</b>	The regular expression is replaced with this text each time it appears. If the replacement is empty, each occurrence of the regular expression is removed from the text. Enter #space for a blank value (" ").

---

## Examples

***jedox.***

***jedox.***

Input: CountryName

Parameters:

Regexp	Germany
Replacement	Deutschland

A point replaces all characters:

Regexp	.
Replacement	

Line	Input	Replace	Transformation
1	9,000.128		
2	9.001		
3	9.001,75		
4	9.000.123		

"\" replaces points:

Regexp	\.
Replacement	

Line	Input	Replace	Transformation
1	9,000.128	9,000128	9.00
2	9.001	9001	9,001.00
3	9.001,75	9001,75	9,001.75
4	9.000.123	9000123	9,000,123.00
