

# Planning Assistant: Like

The Like option in the Planning Assistant copies an existing distribution under a consolidated cell and applies it to another consolidated cell.

The Planning Assistant lets you select the elements to apply the new distribution to.

**Planning Assistant** ✕

Type Like ▼

Enter a new value, but use the distribution of values from a different cube slice on the base level.

---

New Value Absolute ▼ 5000

**Source**

Select a single element in one or more dimensions.
