

Previous Year

[Return to Models Overview](#)

This business logic shows actual figures from the previous year in the [Previous Year](#) element of the subsequent year. The actual figures are taken from the [Actual](#) version. The business logic is active for the [Previous Year](#) version and any other version element starting with [Previous Year](#). After adding versions starting with [Previous Year](#), the rule templates handling this business logic in the fact cubes need to be updated.
