

Tags in Jedox Mobile

Jedox uses report-specific tags to enforce certain behavior on mobile devices, such as hiding reports on devices for which they weren't optimized or enforcing a certain orientation (landscape/portrait) for opening reports in Jedox Mobile. These tags help you design reports that best fit the target-device specifications.

Tags for reports are by default only valid for the user setting the tag. However, Jedox Mobile will additionally also read tags set by the admin user in Jedox. If the admin user defines one of the mobile-specific tags listed below for a report, this is then valid for all users.

For more information on how to create and add tags, see [Tags in Jedox Web](#).

Tags in Jedox Mobile

The following tags are currently supported in Jedox Mobile:

phone	If "Filter by device" option is turned on in Jedox Mobile settings, only reports with this tag are shown in the app on mobile phone devices.
tablet	If "Filter by device" option is turned on in Jedox Mobile settings, only reports with this tag are shown in the app on tablet devices.
landscape	Reports with this tag open in landscape orientation in Jedox Mobile. Note: this tag is only supported for iPhone, not iPad.
portrait	Reports with this tag open in portrait orientation in Jedox Mobile. Note: this tag is only supported for iPhone, not iPad.
disable_sheet_selector	Reports with this tag don't show the Sheet Selector Tab control in Jedox Mobile. If you only use one sheet in your workbook or want to hide all but the first sheet, you can activate this tag to hide the Sheet Selector Tab control for this report in Jedox Mobile.
disable_scrolling	Does not display scroll bars or allow for scrolling web reports when displaying on mobile devices.
disable_mobile_zoom	Does not allow for zooming in when displaying web reports on a mobile device.
default_report	Reports with this tag load automatically in Jedox web after login. Note: It is not recommended to use this tag on more than one report. In this case, the first report in alphabetical order is loaded automatically.
