

# Turning IN PREVIEW UI features in Jedox Web on/off

As mentioned in the [Release Notes](#), every new version of Jedox includes features that are IN PREVIEW. You can try them out, see if they meet your requirements, and provide feedback. You can enable and disable most IN PREVIEW UI features in Jedox Web.

## Enabling IN PREVIEW UI features

To enable IN PREVIEW UI features in Jedox Web, follow these steps:

1. Go to **Administration > Settings > Add Key**.
2. Create a new key named `features.rollout.preview` or `features.rollout.experimental`.  
**Note:** the key name must be in lowercase.
3. Set the type as boolean and the value as TRUE.
4. Click **OK**. The key is now available in **Global > Features**.

## Disabling IN PREVIEW UI features

To disable the features, set the value of the key to FALSE.

**Note:** you must log out and in again after every change.
